

AMENDMENT TO THE CLAIMS:

Claims 1-20 (canceled)

21. (currently amended) A breathable laminate, comprising:
a breathable, stretch-thinned barrier film having one or more layers;
at least one film layer including a mixture of filler particles and a biodegradable thermoplastic polymer, ~~the film~~ and having voids formed around the filler particles to facilitate passage of water vapor through the film;
each film layer including a biodegradable thermoplastic polymer; and
a fibrous nonwoven web.
22. (original) The breathable laminate of Claim 21, wherein the film and nonwoven web are adhesively bonded together.
23. (original) The breathable laminate of Claim 21, wherein the film and nonwoven web are thermally bonded together.
24. (original) The breathable laminate of Claim 21, wherein the nonwoven web comprises a spunbond web.

25. (original) The breathable laminate of Claim 21, wherein the nonwoven web comprises a meltblown web.

26. (original) The breathable laminate of Claim 21, wherein the nonwoven web comprises an air laid web.

27. (original) The breathable laminate of Claim 21, wherein the nonwoven web comprises a biodegradable polymer.

Claims 28-30 (canceled)

31. (original) A personal care article comprising the breathable laminate of Claim 21.

Claims 32-34 (canceled)

35. (original) A medical article comprising the breathable laminate of Claim 21.

36. (currently amended) The breathable laminate of Claim 21, wherein the biodegradable thermoplastic polymer in each film layer is selected from polylactic acid polymers; polyesters of butanediol, adipic acid, succinic acid and/or terephthalic acid; and polycaprolactone polymers.

37. (currently amended) The breathable laminate of Claim 21, wherein the biodegradable thermoplastic polymer in each film layer comprises a terpolymer of butanediol, ~~terephthalic~~ terephthalic acid, and adipic acid.

38. (previously presented) The breathable laminate of Claim 21, wherein the filler particles comprise inorganic filler particles.

39. (previously presented) The breathable laminate of Claim 38, wherein the filler particles comprise calcium carbonate.

40. (previously presented) The breathable laminate of Claim 21, wherein the filler particles comprise organic filler particles.

41. (previously presented) The breathable laminate of Claim 21, wherein the filler particles comprise water-swellaable filler particles.

42. (previously presented) The breathable laminate of Claim 21, wherein the filler particles comprise biodegradable filler particles.

43. (previously presented) The breathable laminate of Claim 42, wherein the filler particles comprise a cyclodextrin.

44. (previously presented) The breathable laminate film of Claim 21, wherein the film comprises about 5-80% by weight of the filler particles and about 20-95% by weight of the biodegradable polymer .

45. (currently amended) The breathable laminate of Claim 21, wherein the at least one film layer comprises about 20-40% by weight of the filler particles and about 60-80% by weight of the biodegradable polymer.

46. (currently amended) The breathable laminate of Claim 21, wherein the at least one film layer comprises greater than 45% to about 80% by weight of the filler particles and about 20% to less than 55% by weight of the biodegradable polymer.

47. (currently amended) The breathable laminate of Claim 21, wherein the at least one film layer comprises about 50-65% by weight of the filler particles and about 35-50% by weight of the biodegradable polymer.

48. (previously presented) The breathable laminate of Claim 21, wherein the film has been uniaxially stretched.

49. (previously presented) The breathable laminate of Claim 21, wherein the film has been biaxially stretched.

50. (currently amended) A breathable laminate, comprising:
a breathable, stretch-thinned barrier film having one or more layers;
at least one film layer including a mixture of about 5-80% by weight filler particles and about 20-95% by weight of a terpolymer of butanediol, terephthalic acid and adipic acid, and having voids formed around the filler particles;
each film layer including a biodegradable thermoplastic polymer; and
a fibrous nonwoven web.

51. (previously presented) A personal care article comprising the breathable laminate of Claim 50.

52. (previously presented) A medical article comprising the breathable laminate of Claim 50.

53. (currently amended) A breathable laminate, comprising:
a breathable, stretch-thinned multilayer barrier film including a primary breathable layer and at least one skin layer [,];
the primary breathable layer including a mixture of filler particles and a biodegradable thermoplastic polymer, and having voids formed around the filler particles to facilitate passage of water vapor;
each film layer including a biodegradeable thermoplastic polymer; and
a fibrous nonwoven web.

54. (previously presented) The breathable laminate of Claim 53, wherein the biodegradable thermoplastic polymer is selected from polylactic acid polymers; polyesters of butanediol, adipic acid, succinic acid and/or terephthalic acid; and polycaprolactone polymers.

55. (canceled)

56. (previously presented) The breathable laminate of Claim 53, wherein the skin layer further comprises filler particles, and has voids formed around the filler particles to facilitate the passage of water vapor.

57. (previously presented) A personal care article comprising the breathable laminate of Claim 53.

58. (previously presented) A medical article comprising the breathable laminate of Claim 53.

59. (new) The breathable laminate of Claim 50, wherein the nonwoven web comprises a biodegradable polymer.

60. (new) The breathable laminate of Claim 53, wherein the nonwoven web comprises a biodegradable polymer.
